Dear Investors

I founded Fortunetrustfx to provide individually customized investment strategies for beginners and high-net-worth investors, family groups and institutions. Too many investors fall through the cracks at large investment companies, and many receive cookie-cutter investment advice larded with commissions and conflicts of interest. As an independent registered investment company, Fortunetrustfx is intentionally designed to let the most appropriate investment ideas drive the strategy. Our fee is derived from the value of the portfolio, not what it contains. Although many of our clients are sophisticated enough to manage investments, it doesn't mean they want to do it as a full-time job. We focus on our clients' portfolios every day, so they can have a good investment returns.

However, we are very closely connected to each and every client, so they can message us directly to our Whatsapp about ideas and challenges whenever they please. You don't get that type of service from a large institution, but many investors believe they must work with big investment firms to gain access to various strategies and markets. Many seek a sense of security and want to know their assets are held by a large stable custodian, our clients are getting the best of both worlds: they receive the close, personal attention that only a boutique firm can offer, while simultaneously benefiting from access to the types of investment and security of one of the world's largest and most trusted institutions.

Our clients want trust, transparency, personalization and low fees. We believe that direct ownership of stocks and bonds complemented by specialized cryptocurrencies is the best way to build your financial status that provide superior performance over a 3-5-year period. We use a combination of "growth" and "value" investing techniques to translate present business conditions into long-term equity appreciation. Our portfolios maintain safe levels of diversification while also taking advantage of market opportunities. We actively manage every portfolio with a balanced and flexible approach to optimize a good investment returns while ensuring long-term stability. If you don't feel like a priority with your advisor or if you'd like to upgrade the management of your assets, I encourage you to contact us to learn how Fine Capital can improve your investment opportunities.

Regards,
CEO - Christopher P. Lorenz

Services

CRYPTO CURRENCY

cryptocurrency, crypto currency, or crypto is a digital currency designed to work as a medium of exchange through a computer network that is not reliant on any central authority, such as a government or bank, to uphold or maintain it. [2] It is a decentralized system for verifying that the parties to a transaction have the money they claim to have, eliminating the need for traditional intermediaries, such as banks, when funds are being transferred between two entities.

STOCK & FOREX

As the name suggests, the stock market is a marketplace for the trading of stocks or shares. There are many stock markets around the world, and the UK's main exchange is The London Stock Exchange (LSE). To form a market index, company shares are grouped together, and their value is combined as a weighted average (the bigger the company the larger its effect on the value of the index) resulting in a figure. Generally, companies of similar size and value are grouped together. Often you hear the market being up or down. This relates to stock market indices rising and falling.

REAL ESTATE

Real estate is defined as the land and any permanent structures, like a home, or improvements attached to the land, whether natural or man-made. Real estate is a form of real property, it differs from personal property, which is not permanently attached to the land, such as vehicles, boats, jewelry, furniture, and farm equipment. Real estate is a critical driver of economic growth in the U.S., and housing starts, the number of new residential construction projects in any given month, released by the U.S. Census Bureau, is a key economic indicator.

MINING

WHAT'S THE INCENTIVE FOR MINERS?

It all comes down to trust: Miners keep the blockchains trustworthy and are rewarded for their efforts.

As miners, we are processing and verifying the transactions of the cryptocurrency ecosystems and keeping their public transaction history (Blockchain) maintained and secure. For this, the mining community is rewarded with the network's transaction fees and newly created coins. It's a win-win situation! When you start mining with us, you are getting your share of this reward.

HOW IS BITCOIN KEPT SECURE?

The only way to not create money out of thin air or corrupt it, is to burn real energy. This is called Proof-Of-Work.

Today, bitcoin is the most secure computer network on the planet and it's practically impossible to break it! The reason for that is hash power, the umbrella term used for the computing power that miners provide to the bitcoin network and similar cryptocurrencies networks. Due to the rapid growth of the ecosystem, mining operations today are mostly running with specialized high-performance computers that function most efficiently set up in large data centers.

AWESOME FACTS
